EDUCATION

Florida Gulf Coast University

Bachelor of Science in Software Engineering, Magna Cum Laude – GPA: 3.80

Fort Myers, FL

Aug. 2023 – May 2026

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, C#, C++, C, Java, SQL

Frameworks & Tools: React, Node.js, FastAPI, Docker, Xcode, Figma, Git/GitHub, REST APIs, Selenium, TestNG

Cloud & Data: Azure, Firebase, PostgreSQL, SQL, Pandas, Plotly

AI & ML: LLM APIs (Anthropic, Gemini), RAG, LangChain, FAISS vector retrieval, prompt engineering

Practices: CI/CD, Agile, mobile and full-stack development, unit testing, code review, debugging

EXPERIENCE

BoomBox Inc

Full-Stack Developer

Fort Myers, FL

June 2026 – Present

- Develop features for a music-based mobile social platform built in React Native for iOS, building and debugging on device through Xcode.
- Implemented a new user onboarding experience from Figma designs, translating mockups into working mobile interfaces.
- Debugged Node.js authentication flows to root-cause Google and Apple sign-in failures, then implemented both providers through Firebase Authentication.
- Resolved database defects causing user login errors, improving authentication reliability across the platform.
- Built React components surfacing the platform's Terms of Service and Privacy Policy for in-app users.

Wabtec Corporation

Software Engineer Intern

Erie, PA

May 2025 – Aug. 2025

- Re-engineered a legacy C# application to Python, reducing cross-team integration friction and enabling seamless compatibility with existing data processing pipelines.
- Identified and resolved 100+ code anomalies through systematic debugging, reducing application runtime by 50% and improving overall test execution reliability.
- Designed a Pandas-based parsing algorithm to normalize data across multiple inconsistent file formats, then resolved resulting Plotly visualization issues to restore accurate test reporting.

Storm Smart

Software Engineer Intern

Fort Myers, FL

May 2024 – Aug. 2024

- Developed a Python web scraper to extract pricing data for windows, doors, and storm shutters from a supplier site that did not publish itemized pricing, enabling internal access to previously hidden cost data.
- Designed an algorithm to isolate per-component pricing (glass, frame, wood type) across three base products, enabling component-level cost modeling that previously didn't exist for the pricing team.

PROJECTS

Web Watch | *Python, Azure, JavaScript, Docker, PostgreSQL, LangChain*

- Built the core web scraping engine for a full-stack monitoring platform that tracks real-time price and stock changes across e-commerce sites, with a focus on GPU listings for client Spoopes.
- Engineered the ETL pipeline parsing scraped content into PostgreSQL and feeding a LangChain RAG system with FAISS vector retrieval and the Anthropic API; containerized with Docker and deployed on Azure.
- Enforced code quality through a CI pipeline requiring unit tests and documentation standards for every new function, ensuring pull requests met team standards before merging.

Browser Buddy – AI Chrome Extension | *HTML, CSS, Python, Gemini API, FastAPI*

- Built a Chrome extension and FastAPI backend enabling users to highlight webpage text, define words at their cursor, or get AI-generated descriptions of their screen, integrating Gemini's vision and text models.
- Implemented OCR-based cursor word detection with a multithreaded mouse-tracking service, and engineered privacy safeguards to block screen capture on sensitive windows.

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Florida Gulf Coast University – Collegiate 100

President

Fort Myers, FL

Feb. 2025 – May 2026

- Mentored 30+ K-12 students through weekly programming focused on academic motivation, social development, and leadership skills.
- Spearheaded a campus-wide pageant at FGCU that generated over \$10,000 in revenue, becoming one of the organization's largest fundraising initiatives.

Florida Gulf Coast University – National Society of Black Engineers

Vice President

Fort Myers, FL

Apr. 2025 – May 2026

- Led STEM education initiatives for 40+ students, directly supporting 15% in securing internships.
- Built and leveraged relationships with NASA, Northrop Grumman, and Hertz Global Holdings to organize industry-led workshops and panels.
